

AI TO REDESIGN TOURISM · BAGALKOTE 2026

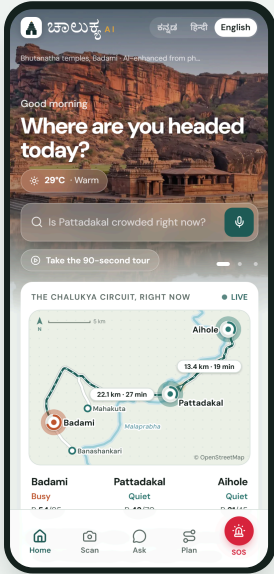

Chalukya AI

One app for every visitor to Badami, Pattadakal, Aihole and the whole of Bagalkote district — in **Kannada, Hindi and English**, and it keeps working **inside the caves with no signal**.

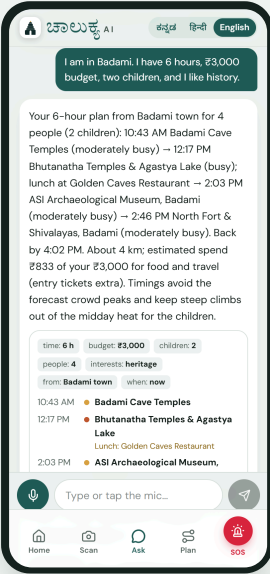

chalukya-ai.vercel.app
Scan, then tap “Take the 90-second tour”. No install.

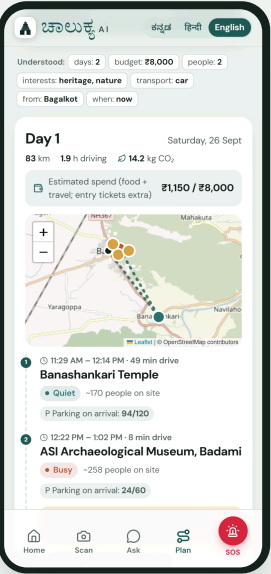

OPEN IT, AND THIS IS THE DAY every picture here is the live app

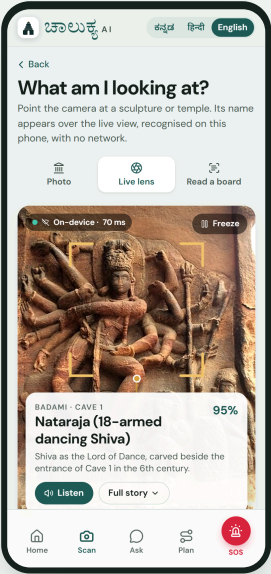

The circuit, live
real roads, crowd, parking

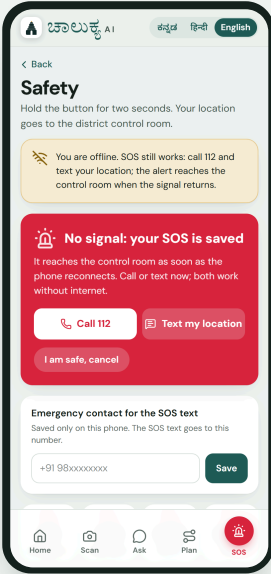

Ask in your words
“6 hours, ₹3,000, two kids”

A timed plan
around crowds and heat

Live lens
names it on the camera

SOS, no signal
saved, 112, text location

WHAT A VISITOR GETS all of it from one QR code, nothing to install

Live circuit map Real roads between the three sites; how busy each is, and free parking.	Ask the guide Typed or spoken, three languages; answers from verified sources only.	Crowd-smart planner One sentence in, a timed day out; shares to WhatsApp or Maps.
Scan a sculpture 25 monuments named on the phone, offline, with the story read aloud.	Live lens (AR) The name appears over the camera as you hold it up.	Read a board Kannada, Hindi and English boards read, then translated into six.
Stay and eat local 19 stays and 34 eateries ranked with the reason; local owners first.	Smart parking Free spaces predicted for the time you will actually arrive.	Safety and SOS Hold two seconds; with no signal it saves, calls 112, texts your place.
Accessible Bagalkote Step-free places, shade, and a plan that avoids stairs.	Local livelihoods V1 GI crafts by distance, Pravasi Mitras, a portal for small businesses.	Report a problem V1 Photograph a crack or litter; it reaches the district by site and topic.
1 Scan the code It opens in the browser. No app store, no sign-in, no ads.	2 Ask, plan or point the camera In Kannada, Hindi or English — typed or spoken.	3 Walk into the caves Recognition, stories, plans and SOS keep working with no signal.

25 sculptures known offline
17 places with stories and sources
3 languages, everywhere
6 languages a board translates into
0 rupees, ads or accounts

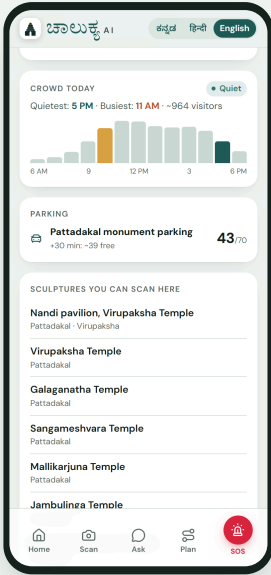

The rest of the app, and the district's side
Sheet 1 of 2 · sheet 2 explains how every part is built

chalukya-ai.vercel.app

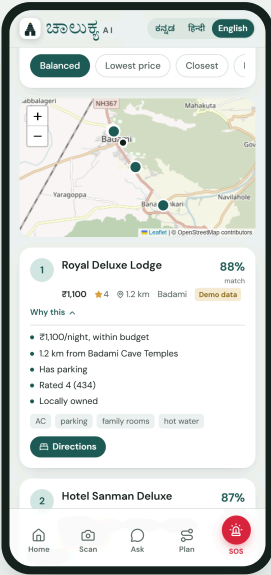

MORE OF THE APP boards, stories, stays, parking, reports

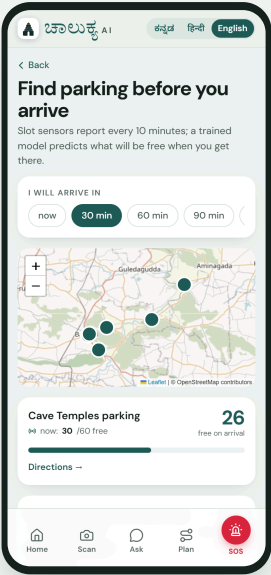

Board in Hindi
read, then translated

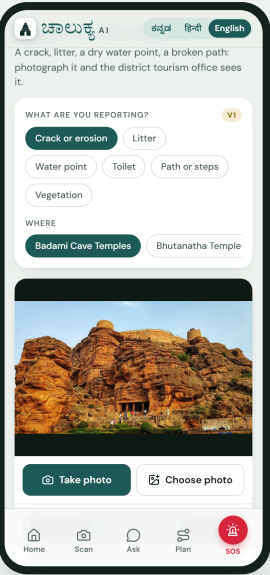

Quietest hour
crowd by hour, parking

Why this stay
the reason on every card

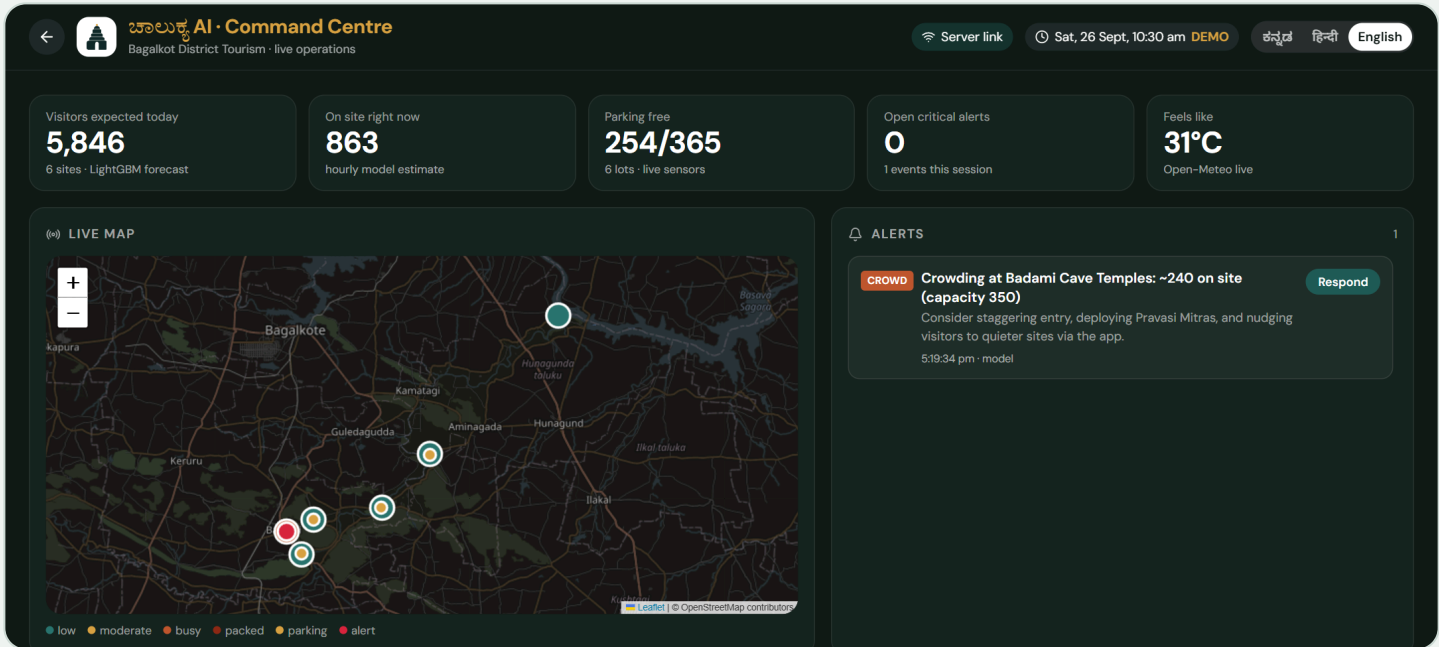

Parking ahead
free when you arrive

Report a crack
marked on the phone

WHAT THE DISTRICT SEES the same platform, from the control room

Live command centre: visitors expected, people on site now, free parking, open alerts, feels-like heat and the live map.

- **Crowd against capacity** at six sites, with today's peak hour.
- **A week planned:** water, waste, bins, toilets, guides.
- **SOS and heat alerts** from phones, with one-tap respond.
- **What visitors say**, by monument and by complaint.

ALL TWENTY PROBLEM STATEMENTS 11 complete · 9 at version 1, marked in the app

✓ 05 Route optimisation	✓ 06 Chatbot 24×7	V1 07 Damage detection	V1 08 Artisan recommendation
✓ 09 Local businesses	✓ 10 Accessible tourism	✓ 11 Translation	V1 12 Skill matching
V1 13 Women & senior safety	✓ 14 Footfall prediction	V1 15 Waste and collection	✓ 16 Water demand
V1 17 Carbon-aware routes	V1 18 Environment reports	V1 19 Sustainable stays	V1 20 Carrying capacity

Honest by design. Real: monument photographs from Wikimedia Commons, ASI's annual visitor numbers, OpenStreetMap places and roads, the district's tourism pages, live weather. Simulated and **labelled inside the app**: the hour-by-hour crowd shape (calibrated so the yearly totals match ASI), parking sensor streams, business prices. **Version 1** means working today at a simpler depth — the app says so on the screen. Sheet 2 gives the method, the datasets and the test scores behind every line above.
