

AI TO REDESIGN TOURISM · BAGALKOT 2026

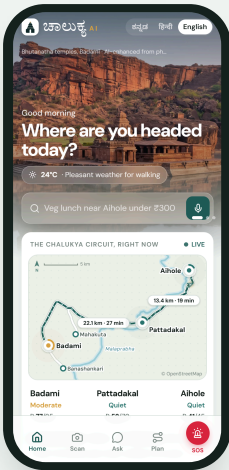

Chalukya AI ಚಾಲುಕ್ಯ AI

One offline-first AI companion for every visitor to Badami, Pattadakal, Aihole and the whole of Bagalkot district, and a live command centre for the people who run it.

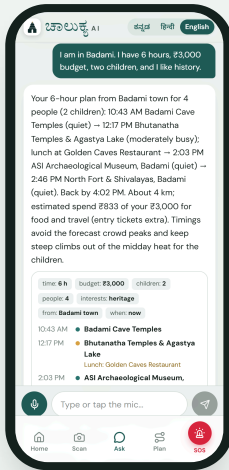

chalukya-ai.vercel.app

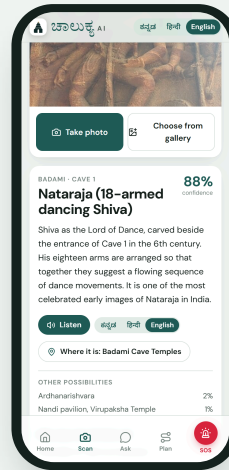

Scan to try. No install; works offline after the first visit.

Live circuit
real roads, crowds,
parking

Ask the guide
"6 hours, ₹3,000, two
kids..."

Scan a sculpture
recognised on the
phone

Read a board
3 scripts, 6 languages

WHAT IT DOES

Live circuit map

Real roads between the three sites; crowd, free parking and drive time on every pin.

Ask the guide

Kannada, Hindi or English, typed or spoken; answers only from verified sources.

Crowd-smart planner

One sentence in, a timed plan out: fewer crowds, less driving, no midday climbs.

Scan and live lens

25 sculptures and temples named on the phone, offline, even in the live camera view.

Read a board

OCR of Kannada, Hindi and English boards; full translation into six languages.

Voice guide

Every story read aloud; switch language in one tap.

Stay and food

Explainable picks by budget, distance and needs; locally owned places first.

Local livelihoods

Ilkal sarees, Guledgudda khana, local guides and small eateries.

Smart parking

Free slots predicted for your arrival time, from slot sensors.

Safety and SOS

Hold 2 s to alert the control room; caution zones, check-ins, heat alerts.

Accessible Bagalkot

Step-free, elder-friendly places and a planner that avoids stairs.

Reviews that matter

Reviews in any language become sentiment and complaint topics per site.

District command centre

Live map, SOS and heat alerts, crowd against capacity, scenario drills.

Forecasts and planning

Seven-day footfall with festivals; water, waste, toilets and guides.

85.8%

sculptures recognised, unseen photographers

13.1%

footfall forecast error (31.1% last-year baseline)

±3.5

parking slots error, 2 hours ahead

95.8%

questions understood, unseen wording

93.3%

review sentiment accuracy

Honest data. Real: 1,960 CC-licensed monument photos, ASI annual footfall, OpenStreetMap, the district tourism book and website, live weather. Simulated and labelled in the app: the hourly crowd shape (calibrated to ASI totals), parking sensor streams, hotel prices. Home photos are real photographs relit with AI.
